November 23, 1945

## COTTONSEED REVIEW - SOUTHWESTERN AREA TO SENTENCE

Movement of Cottonseed. Continued open weather in Texas and Oklahoma during the week permitted the movement of seed at about the same rate as last week. Ginning in the late-producing areas has reached its peak, and; since harvesting in most sections is about 60 to 75 per cent completed, a decreased volume in the movement of seed to oil mills is expected from now on.

Quality of Cottonseed. The average grade of cottonseed received by mills in Texas was 99.0, the same as last week. However, the average grade in Oklahoma improved slightly from 97.5 to 98.0.

Certificates received from Texas showed the highest average grade of 102.0 in District 4 (Blackland area), and the lowest of 66, which was a slight increase over the previous week, in District 9 (Upper Coastal counties).

Seed delivered to oil mills in Oklahoma continued to reflect improvement in grade with District 7 (southwestern Oklahoma) again showing the highest average grade of 100.5. Even though the grade of seed improved considerably in District 6 (central eastern Oklahoma), this district showed the lowest average grade of 91.0.

Frices of Cottonseed: The average price paid for wagon-lots of seed by ginners in Texas ranged from \$34.80 in District 9 to \$58.10 in District 4. The State average was \$53, or 20 cents higher than last week.

Prices paid to farmer's by ginners in Oklahoma ranged from \$43.80 in District 6 to \$54.20 in District 7. The state average was \$51.90, or 40 cents higher than the previous week.

Oil mill prices quoted in Texas ranged from \$55 to \$62 per ton basis grade (100) f.o.b. gins. The generally prevailing price in Oklahona was \$60.

Receipts of cottonseed at oil mills during the first quarter of the current season totaled 1,533,600 tons against 2,400,000 tons a year earlier, according to the Bureau of the Census. Although receipts were only about 64 per cent of those in the same period last season the corresponding figure for crushings was 94 per cent. Crushings totaled 918,000 tons for the 3-month period against 978,000 a year ago. Stocks of cottonseed at oil mills totaled 833,000 tons on October 31, 1945, against 1,541,000 on the same date in 1944. Stocks at the beginning of the season totaled 220,000 tons against 118,000 tons on August 1, 1944.

The sampling and grading of cottonsced is under the supervision of the Production and Marketing Administration. From reports received during the period November 16 to November 22, 1945, the following data are given relative to grades and prices of cottonseed in the counties proced:

following data are given relative to grades and prices of cottonseed in the counties named:
